

AERO Quick Guide

Facility name and date.

Icons representing Key Performance Indicators. Weather impact for 6AM-Noon, Noon-6PM, and 6PM- Midnight. TAER circles represent efficiency from 100 miles to 40, and 40 miles to wheels on. Equipment value is % Adjusted Operational Availability.

Color coding for TAER circles and Taxi Times. Green: Daily avg. =< 3-year seasonal avg.; Yellow: >3-year seasonal avg. to 90th percentile; Orange: >90th percentile to 98 percentile; Red: > 98 percentile.

KPI values for previous day; target or seasonal average; and FYTD. 90 Day trend also displayed. **Click** on KPI names to access detail reports.

Hourly TAER, Arrivals, and Departures. **Click** on an hourly value to open a new window with individual flight information.

Hourly Taxi Out (grouped by actual Gate Out) and Taxi In times (grouped by actual Wheels On). **Click** on an hourly value to open a new window with individual flight information.

Hourly weather impact with contributing conditions. Color coding represents none, minor, moderate, and severe weather.

Hourly arrival and departure acceptance rates.

Infrastructure Service as Needed. **Click** on an hourly value for detail on air traffic or navigation services that were not available.

Color coding for TAER circles, taxi times, and weather.

AERO (ATO Efficiency Report Online) ATL for 08/02/2016

Key Performance Indicators	08/02/2016	Target or 3-Year Seasonal Average**	FYTD	90 Day Rolling Trend
TAER*	91.26	95.01	95.87	
Average Taxi In Time (Min)	8.30	9.92	8.22	
Average Taxi Out Time (Min)	22.04	19.11	16.94	
Go Arouns	2	4	3	

* TAER for Reportable Hours Only.
** The TAER is compared to a target. Taxi-In and Taxi-Out Times and Go-Arouns are compared to a 3-year seasonal average.
