

AERO (ATO Efficiency Report Online) (V2)

- Facility Location ID and date. Click on the hyperlink to change the facility or Date. ASPM 77 only. The  indicates a note is present at the bottom of the report indicating quality issues.
- OPSNET Total Operations: Total Airport Count
- Weather: Weather impact for 5AM-Noon, Noon-6PM, and 6PM-Midnight. See item 15 for color indicators
- ADC: Check mark indicates target met or exceeded, x indicates target not met; dash indicates no target exists
- Taxi In/Out: Green: Daily avg. <= 3-year seasonal avg.; Yellow: > 3-year seasonal avg. to 90th percentile; Orange: > 60th percentile to 98th percentile; Red: > 98th percentile.
- Go Arouns: Total number of Go Arouns
- Diversions/Recoveries: Total Diversions / Recoveries
- Equipment: Infrastructure Service as Needed number of outages.
- KPI for previous day: target or seasonal average; and FYTD. 90-Day trend also displayed. **Click** on KPI names to access detail reports.
- Hourly Arrivals and Departures: **Click** on an hourly value to open a new window with individual flight information.
- Hourly Taxi In/Out: Out (grouped by actual Gate Out) and Taxi In times (grouped by actual Wheels On). **Click** on and hourly value to open a new window with individual flight information.
- Hourly Weather Impact with contributing conditions. Color coding represents none, minor, moderate, and severe weather. Airport weather codes displayed when impact is greater than none.
- Hourly arrival (AAR) and departure (ADR) called rates
- Infrastructure Service as Needed **Click** on any hourly value for detail on air traffic or navigation services that were not available.
- Color coding for weather
- Create a PDF or provide feedback
